Conference on System Software to Take Place in Hanover in March 2018

The newly founded division SYS of the Gesellschaft für Informatik is planning a conference on system software for tomorrow's industry and the internet of things.

The event is being organized by Prof. Daniel Lohmann and Prof. Markus Fidler from Leibniz Universität Hannover. Deadline for the submission of possible contributions in the field of technical challenges of system-oriented computer science is 17 December 2018.

The SYS division of the Gesellschaft für Informatik consists of the two sections "software systems" an "communications and distributed systems" representing system-oriented practical computer science in Germany.
