The next meet-up of the "Data Science Hannover" group will take place on 17 April at 6:30 pm at L3S. The startup Wingfield will introduce an example of using CNN in practice: the entrepreneurs classify movements in sports like tennis. By using modern image processing and artificial intelligence they pursue the digitization of tennis courts to improve the player’s technique and to give personal coaching advice on the smartphone. The team has been supported by the EXIST startup grant since August 2017.

Please register for the meet-up on: https://www.meetup.com/de-DE/Hannover-R-User-Group/

When?
Tuesday, 17/04/2018, 18:30 - 20:30

Where?
L3S, Appelstr. 9a, 15th floor, room 1526 (Multimedia-Raum)

Meetup "Hannover Data Science" on 17 April at L3S
