As part of the thesis, the Facebook game “History Challenge” was developed. It allows players to correctly order historical events by time. We are seeking players that accept the “history challenge” and thereby help science. The game is running until mid of June. The master thesis is supervised by Prof. Robert Jäschke. You can contact history-challenge@l3s.de for further information and feedback. We thank all people who helped to set up the game.

Good luck and a lot of fun!

Participate in the History Challenge and help science
