Key outcomes include the LinkedUp Data Catalog, the LinkedUp Challenge and related events (Veni, Vidi, Vici Competition, the LAK Data Challenge) as well as an extensively growing community, forming a so far unprecedented network of organisations active in exploring the possibilities offered by the Web of Data to facilitate Open Education.

Next to coordinating the project, the L3S also leads the LinkedUp challenge related activities, is core partner contributing to the LinkedUp Data Catalog and, being coordinator, is strongly involved in all activities and events related to the project.

After a one day review meeting and productive Q&A sessions, the project was rated as "excellent" by the review committee. Recommendations from the reviewer will help in steering LinkedUp through the coming months.
