Leibniz Research Alliance Science 2.0

Since November 2013 L3S Research Center is member of the Leibniz Research Alliance Science 2.0. The alliance is investigating how the Web is changing science and scientific publication processes. Science 2.0 is increasingly shaping science through new forms of participation, communication, collaboration, and open discourse in research and publication processes. The L3S, as a member of the association, will be part of a group of notable institutes and facilities that are intensively dealing with and investigating Science 2.0. Due to its expertise in the analysis and design of the complex interplay of technology, humans and information in the Web, the L3S will research questions in the areas of science and scientists in the Social Web as well as Linked Data for science. Scientists at L3S collaborate within the following Science 2.0 projects:

- [Netiquette and profile in Science 2.0](#)
- [#science - Analyzing and Supporting Scientists with Twitter](#)
- [BibSonomy](#)
- [VIVO for discipline-specific communities](#)
- [Book Sprint #CoScience @ CeBIT 2014](#)

Coordinator and contact person at L3S is [Prof. Robert Jäschke](#).
