New Member at L3S

We are welcoming Professor Kurt Schneider as a new Member at L3S. Kurt Schneider studied Computer Science at Friedrich-Alexander-Universität Erlangen (Germany). He received a Ph.D. in Software Engineering.

From 1994 to 1996 he held a postdoctoral position at the Center for LifeLong Learning and Design (L3D) at the University of Colorado at Boulder, USA. From 1996 to 2003, Kurt Schneider was a researcher and manager at the DaimlerChrysler Research Center in Ulm, Germany. His team conducted projects with business units. Kurt Schneider was the head of the International Software Experience Center (SEC) for DaimlerChrysler. SEC was a consortium of five global companies for sharing experience on software engineering. In 2003, Kurt Schneider received a full professorship in software engineering at Leibniz Universität Hannover. His main research interests include requirements engineering, information flow optimization, and software quality. Kurt Schneider focuses on situations in which software technology and humans interact, such as in usability or security, agile methods or complex socio-technical systems.
