The L3S Research Center focuses on fundamental and application-oriented research in all areas of Web Science. It is well known for its outstanding scientific excellence, its high range of diversity as well as its efficiency networking and management.

Founded in 2001 and located in Hannover (Germany), L3S is a research-driven institution that attracts highly skilled students and researchers from all over the world with its open and unique research culture.

For young researchers, L3S is an exciting, innovative, and supportive work environment. More than 100 researchers from over 24 nations, are actively engaged in interdisciplinary research in the field of Web Science. Our research areas range from information retrieval, databases, semantic web, performance modeling, service computing, to mobile networks.

L3S primarily focus is research, but we are also involved in consulting and technology transfer.
